**Best Practice 2:**

**Title of the Practice:** Eco-friendly election system

**Objective:**

- To go with technology for Voting and Counting in Student Council Election

**The Context:**

In the conventional mode whole election process was tiresome and time consuming. Moreover, sometimes an element of doubt pervaded after result declaration.

**The Practice:**

In Pub Kamrup College, Election to the Student Council is done through software. Computerised Voting and Counting technique were developed by a group of students and teachers from the department of Software Development and System Administration (B. Voc SDSA). Use of such type of software is an innovative way of accomplishing the task of voting. The college has minimised the use of paper not only in terms of ballots, but also in moving towards the practice of paperless campaign. Students perform campaigning by visiting classrooms in the pre-fixed days finalised by the Election Committee

**Evidence of Success:**

Paperless and eco-friendly environment during elections saves money of both the institution and the candidates. It contributes to the objective of "Clean and Green campus". The process of election and counting gets completed in a single day with no element of doubt.

**Problems encountered and Resources Required:**

The college has faced no problem in continuing this practice.
