

## REPORT ON SURVEY

**Date:** July and August, 2019

**Venue:** Agdala Village, Nanara Village (Nagaon), Bonbari Village, Radhakuchi

**Organised by:** Feeder Village Research Centre, Pub Kamrup College

**No of participants:** Around 150 students

### **Description of the Programme with expected programme outcome:**

Around 150 students from various departments like Economics, Geography, and Political Science actively participated in a survey to the nearby feeder villages of our college. The survey was a household survey on different dimensions of socio economic status of the survey area. The survey was of two sorts- one is **Baseline Household Survey Form** and the other is **Questionnaire to voters**. The first survey collected data on General Household information, Annual income from all sources, family member information, Migration status in a family, information of govt. schemes, information about sources of water, sources of energy and power, landholding information, agricultural inputs, livestock numbers, major problems in village. The second survey collected information on General information of the respondents, information on general political awareness, political participation and Articulation of demands.

The survey was conducted during the month of July and August, 2019 in different villages like Baihata, Nanara, and Nagaon under Nagaon Gaon Panchyat. As the college is located in Nagaon G.P., the survey was initiated from Nagaon GP itself. Around 400 households were surveyed under Nagaon Gaon Panchyat. Students submitted their surveyed data to the Feeder Village Research Centre. The data was tabulated in MS-Excel Data-sheet.

The students were trained how to conduct survey, how to prepare questionnaire and various information were shared and discussed related to survey work. Students performed a good survey work with splendid vigour and enthusiasm.
