According to my point of view, i would like to suggest that the departmental faculties should try some methods to attract the students towards their study mood by making some interesting seminars, interactive sessions or quiz competitions regarding their subjects because it will help a lot to engage ourselves in study for more time and gain knowledge in those fields both practically and theoretically.

Teaching-Learning process is very well and i am proud to be a part of this institute

Teachers should notice about students interest or weakness and they should use different new technology for teaching.

Try new things...

The teachers are good but the university curriculum is not on par with the syllabus of the students. We, students barely get enough time to read our lessons thoroughly.

**ANALYSIS OF STUDENTS' SATISFACTION SURVEY, 2022-23**  
**PUB KAMRUP COLLEGE**

The Students' Satisfaction Survey (SSS), 2022-23 reveals that the teaching and learning process has been able to facilitate the student community for their cognitive, social and emotional growth. Teachers can effectively communicate the students not only in class but also in others. Internal evaluation process is fare and transparent. In the aspect of using student-centric method such as experiential learning, participative learning and problem solving methodologies, the result is very good. Teachers always encourage the students to participate in extra curricular activities. Teachers makes efforts to a great extent to inculcate soft-skills, life-skills and employability skills to make students more competitive. However, there is a need to make more use of ICT tools in teaching learning process.

**Recommendations:-**

1. More number of ICT classes to be engaged.
2. More emphasis should be given on practical learning.
3. No. of digital classrooms should be increased.
4. Skill education may be introduced.
5. More effort can be made for provisioning campus placement.
