Students' Feedback 2021-22

Conclusion

On the basis of the feedback collected from students, it can be deduced that more or less there is a need for each of the teachers to work on teaching learning activities and make teaching learning activity student centric. Remedial classes, home assignments etc. may be suggested for welfare of the students. Teachers should encourage students so that teaching becomes enjoyable. Teachers must go through the score awarded to individual teachers for more development as a teacher.
